ABOUT ME

B.Tech 2nd year Computer Science and Engineering student with beginner-level experience in front-end development. I have studied database systems and programming languages including C and Python, and have hands-on experience through academic projects such as a database API system. I am actively learning web technologies and aiming to build practical, real-world software skills.

EDUCATION

JK Lakshimipat University

Bachelor of Technology in Computer Science

2024 - 2028

SKILLS

- SQL Database
- Data Structures
- C programming
- Python
- JavaScript
- HTML5 & CSS
- Problem Solving

PROJECTS

Cryptocurrency Market Sentiment Analysis | Python, NLP, Scikit-learn — 2025

- Built an NLP-based sentiment analysis system on 242K+ crypto data points (news, tweets, price data from 2018–2023).–
- Preprocessed text using normalization (crypto slang mapping), lemmatization, stopword removal, and TF-IDF (10K features with bigrams).
- Trained multiple models including Logistic Regression, Linear SVM, KNN, and Decision Tree; achieved best accuracy of 78% using SVM.
- Analyzed sentiment trends showing spikes in negative sentiment during major events (e.g., Luna, FTX collapse) with 0.17 correlation to price movements.

Hostel Game Management System – Database API — 2025

- Developed a database-driven API system to manage hostel game records
- Implemented CRUD operations for player details and game participation

CERTIFICATIONS

- Database Management System Infosys Springboard
- TCS iON Career Edge -Young Professional
- Java Script Infosys Springboard
